

NAS Team,

Today, March 24, the AEDC Crisis Action Team (CAT) continued meetings to discuss COVID-19 planning contingencies.

Arnold AFB was elevated to HPCON Charlie this afternoon; no immediate impact is expected to Arnold AFB operations.

In addition:

- Tunnel 9 remains in HPCON Bravo status
- NFAC employees are sheltered in place at their homes
- NAS business travel remains restricted

Note: Arnold AFB and Tunnel 9 operations are continuing.

100% screening will be conducted at Arnold AFB entry gates. Employees are expected to:

- comply with social distance spacing (six feet)
- limit in-person meeting attendees to no more than 10

Charging Guidance was sent out yesterday for potential base closure. Employees should have designated how their time should be charged for the next four weeks. While we do not know how long a potential closure could last, the four-week period provides sufficient planning information.

Frequently Asked Questions (FAQs) are now posted on the NAS internal website at <https://team.nas-llc.us/Pages/Coronavirus-Info.aspx> and are being will be updated as changes occur.

Please continue to utilize appropriate personal hygiene practices.

Notify your supervisor if you or an immediate family member have:

- a confirmed COVID-19 case
- been quarantined, or
- been placed under medical observation

The Air Force has advised that most Health Departments want you to call your primary care provider first, and the provider will conduct triage over the phone. If you meet the criteria, the provider will refer you to a testing location.

Most importantly

Do not let this situation create workplace distractions. Stop work immediately if you have any safety concerns.

It is in the interest of National Security as well as the AEDC and NAS workforce that everyone adhere to prevention recommendations to minimize the possibility of COVID-19 transmission.

Managers and Supervisors: Please ensure this information is shared with your teams.

Craft Supervisors: Please read this email to your team members.
